Subject: Recommendation for **Andrew Vinston D'Souza** – SOC Analyst / Cybersecurity Intern

Dear **Hiring Team**,

I am pleased to recommend **Andrew Vinston D'Souza**, a student at St. Aloysius (Deemed to be University), Mangalore, for a SOC Analyst / Cybersecurity Intern opportunity. Over the time I have known of his academic progress and commitment to cybersecurity, he has shown curiosity, discipline, and a willingness to build practical skills beyond the classroom.

Andrew has developed a solid foundation in **Linux and computer networking**, including command-line work, system administration fundamentals, the OSI model, TCP/IP, and packet analysis. These fundamentals are important for understanding endpoint activity, investigating security events, and recognizing unusual behaviour in a network environment.

He has also progressed from completing hands-on learning exercises on platforms such as TryHackMe to building an independent SOC lab project called **Sentinel**. In this lab, he has worked with **Wazuh** for security monitoring and file-integrity monitoring (FIM), tested detection behaviour, reviewed security event logs, and documented investigation evidence. This work reflects an emerging understanding of how alerts are validated and how findings can be recorded clearly and methodically.

Andrew's approach is practical and evidence-driven. He is learning to compare expected and observed detection results, investigate why a rule does or does not trigger, and improve the quality of his technical documentation. He approaches unfamiliar topics with persistence and treats testing and verification as important parts of the learning process.

I believe Andrew would bring a strong learning mindset, foundational technical knowledge, and genuine commitment to a junior cybersecurity role. I recommend him for consideration for a SOC Analyst / Cybersecurity Intern position, where he can continue developing his skills under the guidance of an experienced security team.

Please feel free to contact me at jovitamonis2002@gmail.com if you require any further information.

Sincerely,

Jovita Monis
